# PRODUCT SPECIFICATION FOR APPROVAL

Product Description :	3mm Square SMT Trimmer Potentiometers
Product Part Number :	EVM3ESX50B**

Country of Origin	:	JAPAN
Applications	:	Standard Components for Generalized Electric Equipment

\*If you approve this specification, please fill in and sign the below and return 1 copy to us.

# 3.2 Characteristics

## 3.2.1 Electrical Characteristics

Item	Performance	Test Methods	
Resistance Law	0B (Linear)	Conforming to JIS C 5260-1 4.9	
Minimum Resistance	Shall be below 2 % of Nominal Total Resistance.	Conforming to JIS C 5260-1 4.7	
Temperature Coefficients of Resistance	Shall be within $\pm 250 \times 10^{-6}$ /deg.	C Conforming to JIS C 5260-1 2.2.19	
Sliding Noise	Shall be below $5 \%$ of Nominal Total Resistance. $\frac{Vn / Is}{R} \times 100 \le 5 \%$ Vn :Noise voltage Is : Test current R :Nominal Total Resistance I = 100  Moise Vn Noise voltage Vn Noise voltage	Conforming to JIS C 5260-1 4.15 method B. Constant current power source $\begin{array}{c} & & & \\ & & \\ \hline \\ & & \\ \end{array}$ Constant power source $\begin{array}{c} & & \\ & \\ \hline \\ & \\ \hline \\ & \\ \end{array}$ Constant power source $\begin{array}{c} & & \\ & \\ \hline \\ & \\ \hline \\ & \\ \end{array}$ Constant $\begin{array}{c} & & \\ & \\ \hline \\ & \\ \hline \\ & \\ \end{array}$ Constant $\begin{array}{c} & & \\ & \\ \hline \\ & \\ \hline \\ & \\ \hline \\ & \\ \end{array}$ Constant $\begin{array}{c} & & \\ & \\ \hline \\ & \\ & \\ \hline \\ & \\ \hline \\ & \\ \end{array}$ Constant $\begin{array}{c} & & \\ & \\ & \\ \hline \\ & \\ & \\ \hline \\ & \\ \hline \\ & \\ \hline \\ & \\ \hline \end{array}$ Constant $\begin{array}{c} & & \\ & \\ & \\ & \\ \hline \\ & \\ & \\ \hline \\ & \\ &$	
art Name 3mm Squar	e Trimmer Potentiometers	ssue Revisions	

Item	Performance	Test Methods
Angle of Rotation	Electrically Effective Range 260 ° ±20 °	Conforming to JIS C 5260-1 4.4.6
Rotation Torque	2 mN• m to 20 mN• m	Conforming to JIS C 5260-1 4.18
Adhesion	No damage on appearance, mechanical and electrical performance.	<ul> <li>After mounting SMD at recommended land pattern on the test printed wiring board.</li> <li> ← horizontal direction 10 N         <ul> <li> ← horizontal direction 5 N</li> <li> Apply the pressure in two direction for each time 10 s as illustrated above.</li> </ul> </li> </ul>
Resistance to Vibration	$\begin{array}{llllllllllllllllllllllllllllllllllll$	<ul> <li>Frequency range</li> <li>Peak to peak amplitud: 1.5 mm</li> <li>Sweeping</li> <li>Test duration</li> <li>Brush setting point</li> <li>10 Hz to 55 Hz</li> <li>1.5 mm</li> <li>5 min/cycle</li> <li>5 min/cycle</li> <li>2 h in each directions(X,Y,Z) (6 h in total)</li> <li>middle point</li> </ul>
Shock	$\begin{array}{llllllllllllllllllllllllllllllllllll$	<ul> <li>Wave form</li> <li>Peak acceleration</li> <li>Duration of pulse</li> <li>Number of times</li> <li>Brush setting point</li> <li>Half-sine pulse</li> <li>981 m/s<sup>2</sup></li> <li>981 m/s<sup>2</sup></li> <li>6 ms</li> <li>3 times in each directions(X, Y, Z)</li> <li>(18 times in total)</li> <li>middle point</li> </ul>
Resistance to Soldering Heat	Total resistance change shall be within ± 2 % of initial value and no damage on apperan	Conforming to 4.1 Mounting Notes,Soldering Method(1). • Number of times : 1 time
Solderability	New solder should be wet on the electrode and be raised, and wet a of the solder should be less than 90degree.	Reflow soldering should be done on the print board for the test by the recommended land pattern. • Solder paste :Sn-3.0Ag-0.5Cu(RMAtyp • Paste thickness :150 μm • Reflow conditions :Peak-temp. 250 deg.C maximum 230 deg.C or more time 30 s to 40 s

3.2.2 Mechanical Characteristics

Item	Performance	Test Methods
Resistance to Cold	Total resistance change shall be within $\pm$ 5 % of initial value.	$\begin{array}{llllllllllllllllllllllllllllllllllll$
Resistance to Teat	Total resistance change shall be within $\pm$ 5 % of initial value.	Test temperature : 70 deg.C ± 2 deg.C Test duration : 500 h ±12 h Brush setting point : middle point
Change of Femperature	Total resistance change shall be within $\pm$ 5 % of initial value.	Low temperature :-40 deg.C ± 3 deg.C30 min High temperature : 85 deg.C ± 2 deg.C30 min Room temperature : 5 min Number of temperature change cycle : 50 cycle Brush setting point : middle point
Resistance to Damp,Heat	Total resistance change shall be within ± 5 % of initial value.	Test temperature: 60 deg.C ±2 deg.CRelative humidity: 90 %RH to95 %RHTest duration: 500 h ±12 hBrush setting point:middle point
Endurance Under Damp , Load)	Total resistance change shall be within ± 5 % of initial value.	Test temperature: $60 \text{ deg.C} \pm 2 \text{ deg.C}$ Relative humidity: $90 \ \% \text{RH}$ to $95 \ \% \text{RH}$ Test duration: $500 \text{ h} \pm 12 \text{ h}$ Load:Votage RatingLoading method:1.5 h on and 0.5 h off(across terminations 1 and 3)Brush setting point:
Endurance Under Rated Load)	Total resistance change shall be within ± 5 % of initial value.	Test temperature : 70 deg.C ± 2 deg.C Test duration : 500 h ± 12 h Load : Votage Rating Loading method : 1.5 h on and 0.5 h off (across terminations 1 and 3) Brush setting point : middle point
Endurance To Sliding)	Total resistance change shall be within $\pm$ 15 % of initial value.	Number of test revolution : 20 revolution (without electrical load) Revolutional speed : 5 /min to 10 /min One revolution means more than 90 % of the total electrical range.

# 4 Application Notes

# 4.1 Mounting Notes

Reflow Soldering When reflow soldering, please observe below conditions.	
Temp. (deg.C)(Reflow Soldering Profile ] $P \in a \not k - J \not a m p =$	20 s 0 s graph.
Recommended condition 1 Peak 250 (deg.C) 240 10 20 30 40 50 60 Time(s)(230 deg.C or more) (1)In case of reflow soldering, please measure actual temp. on the product surface and observe recommended condition described (2)In case of exceeding recommended condition please consult with us before use. (3)The temp. strongly depends on measurin method of profile, please note how to do i (4)In case that temp.changes by PWB size, mounting density and so on, please check them by each PWB.	left. ion, g
Manual Soldering       When manual soldering, please observe below condition.         • Soldering iron       : 20 W       maximum         • Soldering iron tip temperature       : 280 deg.C       maximum         • Soldering time       : 3 s       maximum	
Soldering time       : 3 s       maximum         Soldering Notes       This trimmer potentiometer is available for reflow soldering and manual soldering only.         Soldering Notes       Solder and flux dissipated on the surface of element and contactor cause fatal damage, therefore in case of making wash and rinse, please consult before use.	
<ul> <li>(2)Design PCB</li> <li>When designing land pattern, please design it, in accordance with recommended land layout described in this production specifications for information.</li> <li>(3)Mounting Notes</li> <li>Mounting top side pressure loaded on the trimmer potentiometer shall 19 N maximum. Overload is afraid to cause fatal damage as transform or breakdown.</li> <li>After soldering ,solder ball or solder scrap may cause short between the land pattern, so please make enough insulation there.</li> <li>(4)Adjustment Notes</li> <li>Adjusting top side pressure loaded on the contactor shall be 9 N maximum. Overload is afraid to cause fatal damage as transform or breakdown of adjustment knotes</li> <li>Adjusting top side pressure loaded on the contactor shall be 9 N maximum. Overload is afraid to cause fatal damage as transform or breakdown of adjustment knob. In case that the moving contact is set near the border portion between electrically effective and non-effective range ,electrically non-effective and open range, be afraid to be deviation of setting value. So avoid the setting like this.</li> <li>(5)Lock paint</li> <li>Avoid applying any lockpaint otherwise intrusion or dissipation of the paint may cause conta dectect. In case of being subjected to apply it,please avoid using adhesives that may generate corrosive gas.</li> </ul>	ct

### 4.2 Circuit Diagram Notes

## (1)Power Rating

The Maximum value of electric power which can continuously dissipated from all area of a resistive element at the rated ambient temperature.

In general, rated power shall be registrated in accordance with size & kind of them. Please observe to use below rated power.Continuously dissipation is afraid to cause fatal damege, for example,deviation,firing,smoking.

(2)Influence of ambient temperature

Influence of ambient temperature can not be neglected for operating trim-pot in general case. Please comply with power derated curve, in case of using it under the condition of exceeding specified power rating.

4.3 Mounting Notes

This trimmer potentiometer is not available for sealed type, so this is afraid to be influented fatally under the following conditions

- influented fatally under the following conditions. (1)Corrosive gas atomosphere of Cl,  $H_2S$ ,  $NH_3$ ,  $N0_X$ ,  $S0_2$  and so on.
- (2)Moisture atomosphere of waterdrop, dewdrop and so on.
- (3)Water,Salt,oil,chemicals,solvents and so on.
- (4)Atmosphere of direct solar radiation.
- 4.4 Storage Notes

Part No.

EVM3ESX50B\*\*

Storage under the following condition should be avoided.

- Be afraid to degrade some performances and soldering wettability.
- (1)Temperature:less than -10 deg.C and more than 40 deg.C,
- Relative humidity:more than 85 %.
- (2)Atmosphere of corrosive gas.
- (3)Long term storage of over 6 months after delivery.
- (4)Atmosphere of direct solar radiation.
- Please store the package without unsuitable load and stress.
- While remaining some product after opening the package, any countermeaure of shutting moisture gas and so on, should be done.
- 4.5 Application Notes for electric equipments and instruments

Although enough care is taken to ensure trimmer potentiometer quality. As life-end breakage mode, some fatal trouble might generate, such as spec-out resistance change, short or open circuits, abnomally generated heat. So please review the affect of any single fault of a potentiometer in advance. (1) The product specification for information ensures the quality of pre-set potentiometers. For applying , please should evaluate this product under the condition built in the appliances. (2) The troubles caused by applying this product under out-specification should not be warranbted. (3)When applying for high-excellent liabilty and security appliances, for example, traffic transportation equipments(train, auto vehicles, traffic-signal equipments), medical apparatus, aircraft, spacecraft, heating, firing, gas, rotating equipment, security equipment, atomic-power equipment, machine-tool, and so on. Please make enough considerations to design fail-safe circuit system for safety as followings. \*To make a safety system by a protective circuit or a protective device. \*To make a safety system by the redundant circuit so that the single fault of a trimmer potentiometer does not cause a dangerous situation. (4)In case of arising some questions on the safety of this product, please don't hesitate to contact with our company and further technical evaluation should be done. #### 5 Operation of product specification for information

(1)Please return one set specification as approval one with accepted stamp or sign, after confirming and checking it .

In case that it will not be returned, in spite of taking three months or more from issue date noted on the cover page of this specification. We could estimate that it has been already accepted, so please consider to operate it.

(2)Changing the content of product of specification for information is to be performed after pre-coordination with customer.

When you confirm revision of this specification, the previous version shall lose its validity.
